Results

Build a table or provide a brief description of results and outcome below.

Requested Variable	Result
9-1-1 Calls Answered in 10 seconds	4,951
9-1-1 Calls Answered August 2026	5,427

Requested Variable	Result
9-1-1 10-second Answer Percentage	91.23%
Busiest Hour for 9-1-1 Calls	1600
Busiest Hour for Non-Emergency Calls	1300
Busiest Hour for all calls	1600
9-1-1 calls in the busiest hour	382
Non-Emergency calls in the busiest hour	917
Total calls in the busiest hour	1,194

Outcome Summary: Report generated and sent by email

Analysis Information

The busiest hour for 9-1-1 calls is not what I would have expected, but with school starting back up, there may have been a slight shift in the volume. This may change over time as school settles into session. The admin line calls at 1300 hours is part of the expected range from 1100 hours to 1600 hours.

The successful answer percentage for the month is better than NENA guidelines. We might want to look at the percentage successfully answered in the busiest hour. Looking at that busiest hour, 342 calls or 89.53% of calls were answered in <= 10 seconds.

Follow-Up Required

Follow-Up Needed: ☒ Yes | ☐ No
